Agentic Workflow Blueprint

Application for demo: loan-app

ASCENDION

AAVA Agentic Platform

Expand all | Collapse all | Expand agents | Collapse agents

WF 1 L1-WF-inception-idea-epics-creator

Workflow to create idea or a product vision into epics 2 agents

A1 L1 inception requirements extractor

Transform product vision or idea documents into a comprehensive, categorized list of actionable requirements with traceability and compliance alignment.

INPUT
SOURCE_DOCUMENT – Requirements

WF 4

L1-WF-construction-api-code-generator

Workflow to generate API code (backend) 2 agents

A1 L1 construction tech stack discovery agent

Automatically discover, analyze, and document the technical architecture and technology stack of a given codebase to support code generation and modernization.

INPUT

- OpenAPI Specs, HLD, LLD
- Optional – Validation Report

INPUT LOCATION

- Github 2: loan-app-documentation repo

OUTPUT

- Technical Architecture Discovery

OUTPUT LOCATION

- *NA (In Memory)*

KNOWLEDGE BASES

WF 5 L1-WF-construction-mobile-code-generator

Workflow to create mobile code from provided code and designs 2 agents

A1 L1 construction mobile tech stack discovery agent

Automatically discover and report all technologies, frameworks, and tools used in a mobile development project by analyzing codebases and technical documentation.

INPUT: Wireframes, HLD, LLD | Optional – Validation Report

INPUT LOCATION: Github 2: loan-app-documentation repo

OUTPUT: UI Tech Stack Summary

OUTPUT LOCATION: *NA (In Memory)*
