

Product Requirements Document (PRD)

Product: *Version: {1.0}* **Status:** *{Draft | In Review | Approved}* **Owner:** *Approved By: {Stakeholder Name, Date}*

1. Executive Summary

{2-3 paragraph overview of what this product/feature is, why it exists, and what business outcome it drives. Written for a senior stakeholder who needs context in 60 seconds.}

2. Problem Statement

Business Problem

{What problem does this solve? Who experiences it? What is the cost of not solving it?}

Current State

{How is this handled today? What are the pain points?}

Desired Outcome

{What does success look like? What measurable change do we expect?}

3. Scope

In Scope

- {Capability 1}
- {Capability 2}

Out of Scope

- {Explicitly excluded capability 1}

- {Explicitly excluded capability 2}

MVP Boundary

{What is the minimum viable product? What gets deferred to subsequent releases?}

4. Stakeholders & Users

Role	Name	Responsibility
Product Owner		Final prioritisation decisions
Technical Lead		Architecture and feasibility
Business Sponsor		Funding and business case
UX Lead		User experience and design

Target Users

Persona	Description	Primary Needs
{Persona 1}		
{Persona 2}		

5. Functional Requirements

ID	Title	Description	Priority	User-Facing Tags
FR-01		The system shall	Must-Have	Yes/No
FR-02		The system shall	Must-Have	Yes/No
FR-03		The system shall	Should-Have	Yes/No

Priority Definitions

Priority	Definition
Must-Have	Required for launch. Product cannot ship without this.
Should-Have	High value, expected for launch. Can be descoped with stakeholder agreement.
Could-Have	Desirable. Included if time/budget permits.
Won't-Have (this release)	Explicitly deferred to a future release.

6. Non-Functional Requirements

ID	Category	Title	Description	Priority
NFR-01	Performance			Must-Have
NFR-02	Security			Must-Have

ID	Category	Title Description	Priority
NFR-03	Scalability		Must-Have
NFR-04	Reliability		Should-Have
NFR-05	Usability		Should-Have

NFR Categories

Category	Covers
Performance	Response times, throughput, latency targets
Security	Auth, encryption, data protection, compliance
Scalability	User volumes, data growth, peak load handling
Reliability	Uptime SLA, failover, data consistency, DR
Usability	Accessibility (WCAG), device support, browser compatibility

7. Constraints

ID	Type	Description
C-01	Technology	{e.g., Must use existing AWS infrastructure}
C-02	Business	{e.g., Must not disrupt existing customer workflows}
C-03	Regulatory	{e.g., Must comply with GDPR data residency requirements}
C-04	Timeline	{e.g., Must be market-ready by Q3 2026}

Constraint Types

Type	Definition
Technology	Platform, stack, or integration constraints imposed by existing architecture
Business	Commercial, operational, or organisational constraints
Regulatory	Legal, compliance, or industry-mandated constraints
Timeline	Delivery deadlines or phasing constraints

8. Assumptions

ID	Assumption	Needs Confirmation	Risk if Invalid
A-01		Yes/No	
A-02		Yes/No	

9. Dependencies

ID	Dependency	Type	Owner	Status	Impact if Delayed
----	------------	------	-------	--------	-------------------

ID	Dependency	Type	Owner	Status	Impact if Delayed
D-01	{External system / team / decision}	Internal/External		{Green/Amber/Red}	{What happens if this isn't ready}

10. Gaps & Open Questions

ID	Description	Impact	Suggested Question	Status
G-01				Open/Resolved
G-02				Open/Resolved

11. User Journeys & Acceptance Criteria

{Journey 1: e.g., Customer Enrollment}

Preconditions:

Steps:

1. {Step 1}
2. {Step 2}
3. {Step 3}

Acceptance Criteria:

- Given , When , Then
- Given , When , Then

Edge Cases:

- {Edge case 1 and expected behaviour}

12. Data Requirements

Data Entities

Entity	Key Attributes	Source	Retention
{Entity 1}			

Data Flows

{Description of how data moves between systems — which system produces, which consumes, sync/async, frequency}

Data Privacy & Classification

Data Element	Classification	PII	Encryption Required	Consent Required
	{Public/Internal/Confidential/Restricted}	Yes/No	Yes/No	Yes/No

13. Integration Requirements

System	Direction	Protocol	Frequency	Purpose
{System 1}	Inbound/Outbound/Bidirectional	REST/Event/Batch	Real-time/Daily	

14. Release Strategy

Phasing

Phase	Scope	Target Date	Success Criteria
MVP			
Phase 2			

Feature Flags

{Which features will be behind flags? Rollout strategy (% rollout, canary, etc.)}

Rollback Plan

{What triggers a rollback? How is it executed? Data implications?}

15. Success Metrics

Metric	Baseline	Target	Measurement Method
{e.g., Enrollment conversion rate}			{How it's measured}
{e.g., Points redemption rate}			{How it's measured}

16. Risks

ID	Risk	Likelihood	Impact	Mitigation
R-01		High/Medium/Low	High/Medium/Low	

17. Glossary

Term	Definition
{Term 1}	
{Term 2}	

Appendix

A. Traceability Matrix

Requirement	Epic	Story	Test Case
FR-01	EP-01	US-001	TC-001

B. Change Log

Version	Date	Author	Changes
1.0			Initial draft

C. Sign-Off

Stakeholder	Role	Date	Signature
			☐ Approved
