

Evaluation — L1-inception-vision-generator

Quality Gates

- ☐ All 5 sections present (Executive Summary, Business Context, Full Scope Vision, MVP Scope, Risks & Dependencies)
- ☐ Executive Summary ≤ 5 sentences
- ☐ Feature Areas ≥ 4 with description + capabilities + user value
- ☐ MVP features ≥ 5 with priority + rationale
- ☐ Out-of-scope ≥ 3 with deferral reason
- ☐ User Journeys ≥ 2 with numbered steps + outcomes
- ☐ Risks ≥ 4 with likelihood + impact + mitigation
- ☐ Success metrics are numeric and measurable (no "improve" / "enhance")
- ☐ No placeholder text (`{{ . . . }}` or `<!-- -->`)
- ☐ Artifact uploaded (blob storage 200 response)

Scores ($\geq$ threshold to pass)

Evaluator	$\geq$	Checks
Faithfulness	0.90	Every claim traces to domain KB or input
Hallucination	≤ 0.10	No invented data/stats/regulations
Domain grounding	0.90	Features, users, constraints from KB
Specificity	0.85	Concrete metrics, named entities, no buzzwords
Consistency	0.90	No contradictions across sections
Completeness	0.85	All subsections populated

Reflection Checklist

Before delivering, verify:

- ☐ Problem Statement is specific and quantifiable
- ☐ Business Drivers cite domain KB context
- ☐ Target Users ≥ 3 with domain-relevant roles
- ☐ Feature Areas are domain-specific business capabilities (not "user management")
- ☐ Integration Points reference real systems from domain
- ☐ User Journeys ≥ 2 with numbered steps + outcomes
- ☐ MVP is strict subset of Full Scope Vision

- ☐ Constraints/Assumptions state "Risk if wrong"
- ☐ Risks have Likelihood + Impact + Mitigation
- ☐ Open Questions ≥ 3 for requirements analysis
- ☐ No vague language ("world-class", "seamless", "intuitive", "cutting-edge")
- ☐ No technology/architecture decisions (belongs in HLD)
- ☐ Document is complete and actionable — not a template with gaps

Reflection Process

1. Generate → 2. Check all items above → 3. Fix silently → 4. Deliver final only
